Quality Policy

The company believe that Webtec's vision and values will be best met by the implementation of a quality management system (QMS), which conforms to the requirements of ISO 9001:2015. We believe that our vision of continual improvement and customer focus are perfectly aligned with those of the standard.

The QMS provides a basis and framework for us to work in, to review and improve our values of; Customer focus, Quality, Innovation, Pride, Trust, Respect, Teamwork, Communication and Education.

The senior management team acknowledge that they must provide leadership for all staff in setting realistic targets, providing training, the right environment and facilities to enable continuous improvement. They further recognise that auditing of the QMS is key to our success and therefore all senior managers are members of the internal audit team.

The improvements will be targeted to meet customers' expectations, give excellent value for money and offer opportunities for customers to improve their own products.

The company will always operate a policy of good citizenship in its activities and interaction with society in general and stakeholders.

Martin Cuthbert

Managing Director
