

December 2023

Statement on UK & EU sanctions on Russian Iron & Steel

Regulations

Regulation (EU) 2023/1214 of 23 June 2023 amending Regulation (EU) No. 833/2014
The (UK) Russia (Sanctions (EU Exit) (Amendment) Regulations 2023

Statement

The EU and UK have both introduced trade sanctions banning the import of certain iron and steel products that incorporate iron or steel inputs originating in Russia.

We can confirm that products manufactured by Webtec do not contain any iron or steel directly or indirectly originating from Russia.

To ensure this we have undertaken an audit of all our suppliers and received written declarations of their compliance. We continue to liaise with our suppliers to ensure ongoing compliance with the regulations.
