

HYDRAULIC MEASUREMENT AND CONTROL

High-Flow Divider Combiner

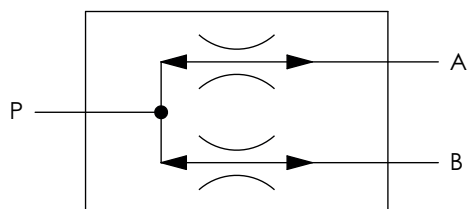

FDC140

**Split flow equally in forward and reverse
regardless of pressure variations**

**Using the high-flow,
high-pressure,
dividing and combining valves**

FDC140

Ideal for keeping two hydraulic cylinders
or motors in close unison

Accurate to
 $\pm 1.5\%$ of max flow

Pressure
compensated

FDC140

Up to 140 L /min and 420 bar,
with 9 different flow-split ratios
