Innovative hydraulic tester Finalist for Industry Award

Webtec was given a Finalist award for its latest DHM4 series portable hydraulic tester with QuickCert™ App nominated for “Technical innovation of the year” at the inaugural Motion Control Industry (MCI) Awards dinner, held at the National Conference Centre, in Birmingham, UK on Tuesday 12th April 2016.

Launched in April 2015, Webtec explains that, “the DHM4 is aimed at field service engineers in the mobile machinery industry to carry out diagnostic testing or preventative maintenance and differs from other portable hydraulic testers. It not only allows the user to carry out a pump test on a mobile machine in-the-field, but also logs flow, pressure, and temperature readings and, uniquely, allows the user to produce and email their customer a test certificate within seconds, without needing to return to the office. The DHM negates the need for a computer to analyse and print the results, instead the tester pairs seamlessly with the user's iPhone, via low-power Bluetooth, and then uses the free-of-charge QuickCert™ App.

For further information on the DHM4 Series hydraulic tester, see www.webtec.com
