

Series MH

Milwaukee Cylinder Series MH ISO Metric Hydraulic Cylinders are built to perform on the toughest applications. Series MH is a complete line of ISO standard hydraulic tie rod cylinders, with maximum operating pressures up to 210 bar on all standard bore sizes. If your application requires higher operating pressures, consult our engineers. *Milwaukee Cylinder* helps you solve even more application needs with our expanded ISO Metric Cylinder product line.

STANDARD SPECIFICATIONS

- Standard construction – square head – tie-rod design
- Nominal pressure – 210 bar; see info box below
- Standard fluid-hydraulic oil
- Standard temperature – -20° C to +150° C
- Standard bore sizes – 25 mm thru 200 mm
- Standard piston rod diameters 12 mm thru 140 mm
- Standard mounting styles– 12 standard styles and custom designs to suit your needs
- Strokes – available in any practical stroke length
- Cushions – available at either end or both ends of stroke
- Three standard rod end styles and specials designed to order

If your hydraulic operating pressure exceeds 210 bar, send your application data for engineering evaluation and design recommendations.

MilCad Cylinder Configurator

Visit milwaukeekeecylinder.com to configure and download CAD files of your cylinders.

STANDARD FEATURES

1. Removable Retainer Plate

The retainer plate and rod bushing are externally removable without disassembling the cylinder on most standard models. Four capscrews securely hold and lock the retainer plate in place.

2. Rod Bushing and Seals

A U-cup Rod Seal with a supporting bronze bushing is standard in *Milwaukee Cylinder Series MH* Cylinders.

3. Ports

BSP/G cylinder ports are standard and can be located to customer requirements. ISO.6149 ports optional.

4. Piston Rod

The piston rod is of high strength steel, hardened and plated to resist scoring and corrosion, assuring maximum life.

5. Piston

The piston is of fine grained alloy iron, incorporating u-cup seals, ensuring non-leak Hi-Lo pressure performance. The piston is pilot fitted and threaded to the rod.

6. Cylinder Barrel and Seals

The barrel is of steel tubing, honed to a fine finish to assure superior sealing, minimum friction and maximum seal life.

7. End Caps

End caps and mountings are of high quality steel, precision machined for accurate mounting.

8. Tie-Rods and Nuts

The tie-rods are constructed from a high quality medium carbon steel. On most sizes the threads are rolled for rigid engagement of the self-locking nuts.

9. Cushions

Cushions are machined to close tolerance to provide positive, smooth deceleration at the end of stroke. On all bore sizes, we provide the longest cushion possible based on the rod size and blind end caps. Longer cushions are available; for further information, consult factory.

10. Cushion Needle Adjustment and Ball Check

The cushion needle adjustment valve and cushion-check ball retainer screw are specifically designed to provide full cushion adjustment.

Simple Maintenance...

Simple maintenance is reality with a *Milwaukee Cylinder*. The rod bushing or rod seals can be inspected or serviced by merely removing the cap screws and retainer plate on most models. Standard available shop tools can be used to remove the rod bushing and seals without disturbing the torque on the tie-rods, assuring performance quality with maintenance ease.

Cushions...

The cushion is of a high-grade alloy, precision machined and specially tapered to provide smooth deceleration of the piston at the end of stroke.

A standard manufacturing process at *Milwaukee Cylinder* is to assemble the piston, cushion, and the piston rod; placing the assembly between centers and checking the critical diameters for concentricity.

Piston Rod...

The piston rod is hardened, plated high strength steel, machined and processed to resist scoring and corrosion, assuring maximum life. *Milwaukee Cylinder* offers three rod end styles as standard. **The style #2 rod end with two wrench flats is furnished as standard** unless otherwise specified. Special rod ends and extra wrench flats are also available. They must be specified at the time of order, giving the dimensional requirements and the location of additional wrench flats.

COMBINATION ROD SEAL DESIGN...

The Series MH cylinder design is a one-piece rod bushing with a double lip u-cup rod seal, a supporting bearing ring, and a double lip wiper.

COMBINATION SEALING ROD

The Series MH cylinder combines two bi-directional sealing u-cup seals and a fine grained alloy iron piston. This proven piston seal design is effective at both high and low pressures. The design gives the wear and shock absorbing qualities of cast iron and the near zero leakage of the u-cup seals.

25 & 32mm Bore Cylinders

5mm extra height applies to port face at the rod end caps only.

TIE ROD MOUNTED CYLINDERS

The flange and tie-rod mounts are basically the same, except that the cylinder tie-rods are extended and used to mount the cylinder. To prevent misalignment, sagging, or possible binding of the cylinder, when long strokes are required, the free end should be supported. The best use of tie-rods when extending on the blind end is in a thrust load application. When using tie-rods extended on the rod end, the best application is a tension load. Tie rod mounts are suited for many applications, but it should be noted that they are not as rigid as the flange type of mounting.

MilCad Cylinder Configurator

Visit milwaukeekeeylinder.com to configure and download CAD files of your cylinders.

25 & 32mm Bore Cylinders*

5mm extra height applies to port face at the rod end caps only.

Flange rated for 210 bar operation.

MODEL MH35*
ISO STYLE ME5

* On 25 mm and 32 mm bore, MH35 mount cylinders with port in position 2 or 4, head height is increased by 5 mm in position 1.

SOLID END CAP MOUNTED CYLINDERS

Milwaukee Cylinder's solid end cap mount is one of the strongest, most rigid methods of mounting. This type of rod end cap mounting is best in a tension application. A solid blind end cap mounting is best in a thrust application.

SOLID ROD END CAP MOUNT

SOLID BLIND END CAP MOUNT

Flange rated for 210 bar operation.

MODEL MH36
ISO STYLE ME6

SIDE OR LUG MOUNTED CYLINDERS

The side or lug mounted cylinder provides a fairly rigid mount. These types of cylinders can tolerate a slight amount of misalignment when the cylinder is at full stroke, but as the piston moves toward the blind end, the tolerance for misalignment decreases. It is important to note that if the cylinder is used properly (without misalignment), the mounting bolts are either in simple shear or tension without any compound stresses.

25 mm and 35 mm port at Rod End available in Position #1 only.

MODEL MH42
ISO STYLE MS2

△ Cushions not available on rod end.

† Available with fixed nonadjustable cushions on rod end and standard adjustable cushions on the blind end only.

* Use this dimension for MH71 mount cylinders with bore sizes 100mm through 200mm.

** Use this dimension for MH72 mount cylinders with bore sizes 100mm through 200mm.

HOW TO ORDER

For ordering information refer to Page 49.

CAUTION NOTES:

* Rod end trunnion mount cylinders in 160mm bore (all rod sizes) and 200mm bore, (110 and 140 sizes) should not be used over 100 bar. If your application requires higher pressure, consult the factory.

NOTES:

♦ For double rod end cylinders, add prefix letter D to cylinder code. Example: DMH0151. (Refer to page 48.) Double rod ends are not available on clevis mount Series MH cylinders.

Rod End Styles and Dimensions

For rod end styles and dimensions see the table in the inside cover of the brochure "METRIC Piston Rod End Styles".

Visit milwaukeekeecylinder.com to configure and download CAD files of your cylinders.

TABLE 2MH The dimensions are constant regardless of rod diameter or stroke.

Bore Ø	BT	E	EE BSPP	F	G	G1	J	J1	K	TD f8	TC h14	TL	TM h14	TK	UH	UM	UT
25	9	40	¼	10	40	-	25	-	7	12	38	10	48	20	45	68	58
32	11	45	¼	10	40	-	25	-	9	16	44	12	55	25	54	79	68
40	14.5	63	⅜	10	45	-	38	-	10	20	63	16	76	30	76	108	95
50	17	75	½	16	45	-	38	-	15	25	76	20	89	40	89	129	116
63	17.5	90	½	16	45	-	38	-	15	32	89	25	100	40	95	150	139
80	22	115	¾	20	50	-	45	-	19	40	114	32	127	50	127	191	178
100	25	130	¾	22	50	72	45	58	19	50	127	40	140	60	140	220	207
125	31.5	165	1	22	58	80	58	72	26	63	165	50	178	73	178	278	265
160	36.5	205	1	25	58	88	58	88	28	80	203	63	215	90	216	341	329
200	57	245	1¼	25	76	108	76	108	31	100	241	80	279	110	280	439	401

* Use this dimension for MH71 mount cylinders with bore sizes 100mm through 200mm.

** Use this dimension for MH72 mount cylinders with bore sizes 100mm through 200mm.

25 & 32mm Bore Cylinders

5mm extra height applies to port face at the rod end caps only.

DOUBLE ROD END CYLINDERS

Double rod end styles are available in every mounting style except clevis. On double rod end cylinders where the rod ends are not the same, be sure to specify clearly which rod end is to go at which end of the cylinder in relation to your mounting requirements.

To obtain dimensional information on a double rod end cylinder, first select the desired mounting style and refer to the corresponding single rod end cylinder model shown on the preceding pages. After you have determined all necessary dimensions from the previous page covering the desired mounting, turn back to this page. Supplement those dimensions with additional ones from the drawing below and the table at the right. These added dimensions differ from, or are in addition to, those shown on the preceding pages and provide the additional information needed to completely dimension a double rod end cylinder model.

On a double rod end cylinder where two different rod ends are required, or two different rod sizes are required, or cushions on one end are required, be sure to state clearly which rod is to go at which end of the cylinder. When two types of mounting styles are required, be sure to specify their relationship to the piston rods, if they are not the same.

See Piston Rod End Table (Inside Cover)

TABLE 2MH

The dimensions are constant regardless of rod diameter or stroke.

Bore Ø	E	F	G	K	EE BSPP
25	40	10	40	7	1/4
32	45	10	40	9	1/4
40	63	10	45	10	3/8
50	75	16	45	15	1/2

Series MH, Ordering Information

▼ CONFIGURE YOUR CYLINDER (Series MH Metric Cylinder Nomenclature)

1	MH1552	-	61	-	2	4	-	9	x	425	
Double Rod End	Cylinder Code (Refer to Table 1MH)		Mounting Style		Rod End Style	Cushions		Cylinder Modifications If standard leave blank		Seal	Stroke

Note:

Use "S" if any special design features are required, describe in detail on your order.

Example:

The code for a MP1 mount metric hydraulic cylinder with an 80mm bore, 56mm rod, Style No. 2 rod end, cushion both ends, standard seals with a 425mm stroke is MH1552-61-24-9 x 425

	Feature	Description	Page No.	Code No.
1	Double Rod End		—	D
2	Cylinder Code	Refer to Table 1MH	7, 9, 11, 13	—
3	Mounting Style	Model Number Only	6, 8, 10, 12	—
4	Rod End Style	Code Number	Inside front cover (iii)	—
5	Cushions	None Rod End Blind End Both Ends	— — — —	1 2 3 4
6	Cylinder Modifications	Special	—	S
7	Seal	Polyurethane (-20° to 200° F)	—	9
8	Stroke	Specify in millimeters	—	—
